Tom,

Zimmerman Well Service, (801)250-1400, out of Magna, Utah will be performing the abandonment work for PMC. The gentleman with the mules is Linn McCourt. Linn will finish hauling in the material today for the licensed well driller to begin the abandonment of the wells tomorrow midmorning.

The air shaft will be abandoned next week due to overheating problems with the rig. I have given Zimmerman your phone number, as well as the BLM's, for him to contact you all as to his exact schedule. I will be in Washington D.C. from September 30 - October 4. I will also have Linn McCourt present on my behalf.

Regarding any blade work, Jeff Alexander told me that the blading would only have to be done if we needed to for access, or if we left the roadways in worse condition that we found them.

Access to all sites will be minimized by the use of foot, mules, or along established travel paths. The only folks using the roadways will be Zimmerman Well Service, Linn McCourt, and me.

Thanks,
Johnny

Johnny,
Thank you for projected start-up of your project. Consistant with your road use permit___Item 2, "Please provide names of contractors and agents who will use the raod"?
And under Item 1 what are your blading plans? I would like to have my representative out there to inspect the work prior to completion.

Thanks
Tom Lloyd

Well Abandonment, Star Point and Willow Creek Mines
AM

Hello Everyone,

Plateau Mining Corporation anticipates commencing the abandonment of water monitoring wells and the Gentry Mountain air shaft on September 23. This day will be mainly mobing and staging the material for the abandonment activities. The water wells will be abandoned under the direct

supervision
of a licensed well driller. The Gentry Mountain area will be done first
to
avoid the hunts and adverse weather conditions.

I will be away from my office this Thursday and Friday. As I get more
definitive dates and times I will relay this to you folks.

Thanks,

Johnny
